

# ADVENTURE DAY-2018

The Adventure club of Waljat College of Applied Science and Technology had organized a trip to Mussanah Millennium Resort on 7<sup>th</sup> May 2018. Millennium Resort Mussanah has inaugurated a floating aqua park in Batinah region. The attraction is situated in the resort's private marina and leverages the expertise of Aflex Technology. A three meter high tower promises to challenge the most adventurous and stake its claim as the floating aqua park's leading attraction. We could enjoy the 175 m long, dual zip line which is managed by the resort's team who are trained and fully certified to highest international standards.

There were 28 students accompanied by two faculties and the students took part in the above mentioned activities. We reached the resort at 11.15 am and the students were divided into girls' team and boys' team. The girls' team was led by Ms. Smitha Felix and the boys' team was led by Mr. Ismail. 2 students simultaneously took part in the zip lining while 14 boys took part in Aqua Park and vice versa. We wrapped up the activities around 3 pm followed by the lunch.

It was an amazing and thrilling experience for the students as it was their first trip to an Aqua park.

**a) Zip lining**

**b) Aqua Park**
